

MedRISER™ Series

1000Lb Bariatric Patient Lift

Dual Controls

Operable at all times

- **Electric**— powered electric lift (height and base) will support up to 1000lbs and can be used in a variety of bariatric lifting situations.
- **Innovative Design** — adds additional space and comfort during max lift heights while safely protecting the actuator.
- **4 point spreader** — added width helps enhance comfort to end user while transferring.
- **Lift Height** — built to have an extremely long lift arm achieving a high lift height which allows it to be utilized for a variety of lifting needs and care settings.
- **Optional Scale**— have the ability to weight patients anywhere and at anytime with a bolt on scale.
- **Dual controls** — controls on the pendant and control box allows the lift to be operable at anytime.
- **Ergonomics**—enhanced thicker push handles designed for multiple caregivers with bottom "kick" support bar for additional leverage and staff safety.
- **Made in the USA**— a quality lift solution with a commitment to keeping inventory and parts on hand.
